✳ **Alternative energy**

DV5374,DV
22 min PIJS 2008 Film Ideas
Narrator, Bruce Miles.
Green Matters: What in the World is Going On? Series - Most everyone realizes the environmental and economic cost for the dependence on fossil fuels for energy, foreign or domestic. So it makes sense to embrace other technologies that are cost efficient and sustainable, yet reduce their negative impact on the planet. Governments, industries, and people worldwide are finding new ways to reduce their energy dependency and environmental impact by investing in sustainable energy alternatives.

✳ **North America—geographic regions & landforms. The Appalachian Range**

DV5391,DV
24 min PIJS 2009 Film Ideas
Narrator, Bunnie Strassner.
North America: Geographic Regions & Landforms Series - Explores the Appalachian Mountains, which run from Newfoundland to the central part of Alabama and form North America's oldest mountain range.

✳ **Biofuels**

DV5375,DV
23 min PIJS 2008 Film Ideas
Narrator, Bruce Miles.
Green Matters: What in the World is Going On? Series - What do animal dung in Israel and leftover cooking oils in North America have in common? Both are being used as bio fuels for powering industrial equipment and motor vehicles. Combine this with efforts to process coconut oil from Uganda and soy from Argentina and you have the hopeful beginnings for fossil fuel independence.

✳ **College Prep**

DV5393,DV
19 min JS 2008 Landmark Media, Inc
Hosts: Shawn Royster, Danielle Smith, Joe Tattersall, Darcy Wood.
Real Life 101 Series - With college just ahead of them, our hosts visit with some people who help students prepare for this milestone. They get some helpful suggestions about applying to schools from a college counselor. Then meet a special tutor whose job is to help students ace those anticipated and sometimes dreaded SAT exams. Finally, we speak with a woman who gives writing tips for college application essays and those challenging classes to comes.

✳ **The Constitution of the United States of America**

DV5397,DV
14 min IJS 2007 Film Ideas
Narrator, Bunnie Strassner.
Symbols of America Series - Young students will greatly appreciate the historic and guiding principles outlined in one of Americas most significant documents, The Constitution of the United States. While symbolizing the ideals of American liberty and freedom, the United States Constitution also articulates the laws upon which America was founded. These laws provide the standards by which the United States is governed and personal freedoms for all citizens are respected and protected.

✳ **Earth**

DV5376,DV
12 min PIJS 2004 Film Ideas
Narrator, Owen Thomas.
What's UP In Space? Series - Earth introduces students to the planet where we live. In addition to discussing Earth's place in the solar system, this program explains the basics of Earth Science, including atmosphere, weather, rock cycle, erosion and the water cycle.

✳ **Endangered Species**

DV5377,DV
21 min PIJS 2008 Film Ideas
Narrator, Bruce Miles.
Green Matters: What in the World is Going On? Series - From Tibet to Argentina and many places in-between, this encompassing look at endangered species offers insight into the plight and hope for many of our planets animals. Along the way we'll search for species now believed extinct, such as the Yangtze Dolphin of China, to more promising efforts in Hungary for repopulating the rare white rhino.

Famous Explorers

Francisco Coronado
Henry Hudson
Hernando de Soto
Louis Joliet & Jacques Marquette

✳ **Francisco Coronado**

DV5378,DV
18 min PIJS 2002 Film Ideas
Narrator, Rich Garcia.
Famous Explorers Series - Describes the journeys of the sixteenth century Spanish explorer who searched for cities of gold in parts of the American Southwest, but discovered only Indian villages.

✳ **Future Car**

DV0357,DV
172 min PIJS 2007 Discovery Channel
Take a fascinating ride to the year 2030, and catch a glimpse at the futuristic car designs that will redefine automobiles as we know them and the incredible technologies that will make it all happen. Highlighting the new ways that cars will take shape, such as engines replaced with wheel motors and steel that is replaced by nanomaterials, FutureCar will immerse you in the world of the visionaries that are creating these unique automobiles. The Body The Body answers the burning question, 'What will Future Cars look like?' Illustrious designers from around the globe weigh in on how a car's shape can, and will, be affected by advancing technologies. You'll be in awe at the change in the hydrogen-capable chassis of the future and be amazed at the endless possibilities offered by Virtual Reality and haptic technology. Experience ultra-light cars, tiny leaning cars, and an entirely new look at the world's first invention: the wheel. The Brain Dive into the core computer of tomorrow's automobile in The Brain. Learn the endless possibilities when your most powerful computer resides in your car. Watch as cars drive automatically, communicate with other cars, coordinate your schedules and communicate with your home computer. The Fuel Put your energy concerns to rest in The Fuel. Learn the many propulsion possibilities that will be available in the very near future and experience life without one universal power source. See cars charged by Farm Fuels, such as Ethanol or Bio-Diesel, Lithium Ion batteries that supply 250 miles worth of highway speeds, unique hybrids, Hydrogen fuel cells, solar panels and compressed air. Discover how your car's fuel may be a function of your driving needs and where you live. The Extremes Discover the remotely possible in The Extremes - a place where imagination rules and cars fly. Meet the visionaries, at the edge of the automotive world, creating extremely new answers to our oldest questions. Like, what will 'speed' mean in the future? Which extreme thinkers will turn the world on to Hydrogen racing? What will Luxury mean in 2030? Who is looking to reinvent the antiquated '18-Wheeler?' And, will there be a new kind of taxicab? Plus, take a ride in an ultra-safe city car made by the world's greatest sports car designer.

※ **Global Warming**

DV5379,DV
22 min PIJS 2008 Film Ideas
Narrator, Bruce Miles.
Green Matters: What in the World is Going On? Series - A critical concern for the planet today is global warming and its probable consequences. And whether warming trends are occurring because of greenhouse gases in the atmosphere or a cyclical change in the weather, we'll investigate this global issue from the polar Arctic to the polar Antarctic.

Green Matters: What in the World is Going On?

Global Warming

※ **Henry Hudson**

DV5380,DV
23 min PIJS 2002 Film Ideas
Narrator, Rich Garcia.
Famous Explorers Series - An English explorer, adventurer and dreamer Henry Hudson put his name on several places along the global map. He set sail in search of the fabled Northwest Passage to the Orient and while sailing for the Dutch East India Company, explored New England's Cape Cod and Chesapeake Bay. He later discovered waters which today bear his name. Born into a wealthy family whose influence caught the attention of the English monarch, Hudson had positioned himself for a promising career.

※ **Hernando de Soto**

DV5381,DV
21 min PIJS 2002 Film Ideas
Narrator, Rich Garcia.
Famous Explorers Series - Describes the journeys of the Spanish explorer who sailed up the west coast of Florida to Tampa Bay, then inland and north to Alabama and through the southeast region. He is also credited for being the first European to discover the Mississippi River.

※ **Ice Age Columbus: Who Were the First Americans?**

DV0371,DV
100 min PIJS Discovery Channel
Traditional history tells us that European settlers discovered America about the time of the Renaissance. But revolutionary new archaeological data and the latest DNA research reveal that Europeans visited our shores far earlier - some 17,000 years before Columbus was even born. Filmed in glorious high definition, this epic drama follows an intrepid family of stone age hunters as they trek from their homeland in southwestern France, cross 3,000 miles of ocean and eventually make their first permanent settlement in what is today the northeastern U.S. Along the way, they overcome starvation and storms with the help of a revolutionary weapons technology they would later bequeath to the native peoples of the Americas. But awaiting the pioneers' arrival is a stark, empty continent, filled with a plethora of bizarre and lethal animals - all brought to life by brilliant computer animation. Firmly rooted in the latest scientific discoveries, it's a compelling vision of the greatest migration in human history.

※ **Iditarod: Toughest Race on Earth**

DV0358,DV
498 min PIJS 2008 Discovery Channel
Experience the last great race on earth, the Iditarod Trail Sled Dog Race - a grueling 2-week adventure that pits teams of man and animal against nature in the savage Alaskan wilderness. From Anchorage to Nome, 96 teams will attempt to traverse over a thousand miles of the most inhospitable terrain on the planet with 16 finely tuned dogs as an engine. Chronicle the highs and lows of this intense competition as man and man's best friend must work together, care for each other, and play a disciplined game of strategy if they hope to be first to the finish line in

Nome. The Last Great Race The 2008 Iditarod race begins and returning champion Lance Mackey already has a hitch in his plan. Iditarod icon DeeDee Jonrowe loses her dog team outside a checkpoint and the mushers prepare to face the dreaded Alaska Range. Surviving The Alaska Range The mushers cross the treacherous Alaska Range while DeeDee Jonrowe faces 'the Step,' the sight of her injury last year. Injury also causes Mackey's lead dog to be dropped and Martin Buser takes a strategic rest at Salmon River before beginning the treacherous trek again. The King And The Pauper With the Alaska Range behind them, mushers turn their attention to rest - a strategy all its own. Mackey, already down a lead dog, cares for his exhausted team. Jonrowe, nursing a virus, is first to the halfway mark, winning Yukon Gold. But at what price? Chase On The Yukon Mackey makes up for lost time while King devises a new plan while Eskimo Nelson debates whether to withdraw from the race. Trouble continues to plague Jonrowe as she is accosted by a drunken fan and the Busers separate to allow former champion, Martin, a chance to go for the gold. The Great Escape Mackey continues to break trail for rival King but is catching on to King's game as rookie musher Holt - making a slew of beginner's mistakes - has to decide whether he can carry on. Nome Or Bust With the finish at Nome less than 100 miles away, Mackey, King and Martin Buser battle for the finish line. Icon Jonrowe battles to stay in the top 10. And for rookie Holt, just finishing Alaska's toughest race might equal winning.

※ **The Lewis & Clark Expedition: A Uniquely American story Part 1**

DV5382,DV
22 min PIJS 2002 Film Ideas
In 1803 President Jefferson purchased land from France soon known as the Louisiana Purchase and Lewis and Clark were commissioned to lead an expedition through this newly acquired U.S. territory. Retrace the adventurous trail from St. Louis to the Pacific Ocean and back, and learn that these true heroes faced adversities and sacrificed personal ambitions for the sake of their country.

※ **The Lewis & Clark Expedition: A Uniquely American Story Part 2**

DV5383,DV
23 min PIJS 2002 Film Ideas

Retrace the adventurous trail from St. Louis to the Pacific Ocean and back, and learn that these true heroes faced adversities and sacrificed personal ambitions for the sake of their country.

※ **Louis Joliet & Jacques Marquette**

DV5384,DV
17 min PIJS 2002 Film Ideas
Narrator, Rich Garcia.
Famous Explorers Series - Describes the journeys of the seventeenth-century French explorers who were the first Europeans to locate and chart the Mississippi River. Louis Joliet, a French Canadian fur trader from Quebec, and Jacques Marquette, a Jesuit priest from France, would together become two of the most courageous French explorers in North American history. During their 1673 expedition, these two men carefully mapped and journaled the unknown regions of the Upper Mississippi River Valley.

※ **The Lower Mississippi River**

DV5385,DV
25 min PIJS 2001 Film Ideas
Narrator, Bunnie Strassner.
Rivers of North America Series - The lower Mississippi River Valley begins near the confluence of the Ohio River, which joins the Mississippi at the southern tip of Illinois. From there, the river travels 700 miles south before it reaches the Gulf of Mexico. Home to one of the most complex ecosystems in the world, the lower Mississippi River Valley has sustained a remarkable environment for a

Titles added 151 to 180 days ago

variety of fish, wildlife, and plants. Each year during the spring and fall millions of birds migrate north and south along the river's rich habitat.

My School Playground (Friends and Sharing)

* **Marty Stouffer's Wild America: Season One**

DV0359,DV
300 min PIJS 2007 Discovery Channel
Witness the vast wonders and infinite diversity of nature firsthand, as you bring the wilds of America home. Hosted by award-winning wildlife photographer and premier naturalist Marty Stouffer, this premier wildlife series features up-close footage of mammals, birds, reptiles, fish and insects throughout the entire wild lands of North America. 10-30 minute episodes Watching Wildlife; Swamp Critters, Wild Dogs, Mountain Monarchs, Time of the Grizzly, At the Crossroads, Bighorn, The Wolf and the Whitetail, Living with Wildlife, Wild Babies.

* **The Moon**

DV5386,DV
PI 2004 Film Ideas
Narrator, Owen Thomas.
What's UP In Space? Series - Even the youngest students are familiar with the moon in our night sky. This program takes viewers to the surface of the moon and outlines the history of lunar exploration. Discussions include the impact of the moon on Earth's tides and calendar.

* **My School Building (Places and People)**

12 min EP 2007 Film Ideas
Max Metcalf, Bill Diamond, Alyssa Mac.
My School, My Responsibility Series - When children are going to school for the first time or to a new school, they are naturally curious and perhaps nervous about what they will encounter. This program gives them a glimpse into what a typical school building looks like, helping to prepare them for what they can expect. Children will learn the main places in the school building and the roles of the people who work there.

* **My School Bus (Safety and Respect)**

DV5388,DV
14 min EP 2007 Film Ideas
Max Metcalf, Bill Diamond, Alyssa Mac.
My School, My Responsibility Series - When children are going to school for the first time or to a new school, they may worry about many things that will be new to them. This program takes children for a ride on a typical school bus, helping to prepare them for what they can expect. Children learn how to stay safe on the bus and getting on and off the bus. They are introduced to the bus driver and learn that the driver is responsible for their safety, and they should respect and listen to the driver. The program also talks about the inside of the bus—the emergency door and riding with other students. Students are taught that they should not talk to strangers and what to do if a stranger will not leave them alone.

* **My School Classroom**

DV5389,DV
13 min EP 2007 Film Ideas
Max Metcalf, Bill Diamond, Alyssa Mac.
My School, My Responsibility Series - When children are going to school for the first time or to a new school, they are naturally curious and perhaps nervous about what they will encounter. They wonder what their new classroom will be like, who will be in it and if they will make any friends, how they are expected to behave, and what is expected of them. This program gives children a tour of a typical classroom helping to prepare them for what they can expect.

My School, My Responsibility Series - When children are going to school for the first time or to a new school, they may wonder what recess is like and what the school's playground will be like. This program gives children a tour of a typical school playground, helping to prepare them for what they can expect. Children learn what equipment a playground usually has, how they can be included in play, how to ask for a turn, how they can make sure others are included, and how to help their classmates. The program also talks about how it is ok to run on the playground, but there are still safety rules, and if you are unsure about anything, ask your teacher. As always, respect is emphasized—respect for the equipment and other people. Students learn about bullying and tattling.

Our Ohio Series - Jerry Suter - When it comes to his fruit and vegetable farm, Jerry Suter gets a lot of help from young people. But Jerry is doing more than paying them. He's teaching students important lessons in agriculture and preservation. Century Farms - The Ohio Department of Agriculture's Ohio Century Farms Program is designed to recognize families who have maintained a farm or homestead in their family for at least 100 years, with an emphasis on well-preserved, working farms. One such farm is owned by Bob and Marietta Martin in Belmont County. Since 1805, buildings and structures have come and gone, but the family tradition remains the same. Doc Sanders: Team Greyhound - When their racing days are behind them, most greyhounds face a very bleak future. But an organization called Team Greyhound has a unique program for rehabilitating these former race dogs and getting them ready for real homes. Ask Chef Pierre: Dried versus Fresh Herbs - Our Ohio Chef Pierre Wolfe explains

Narration: Tom Zirm.
Water for Life: Study of recreational use, water quality, history, and water resource management and monitoring, and conservation of the Sandusky River Watershed in northwest Ohio. Water as a resource is discussed. Several questions are posed for consideration on water as a natural resource. Human activities may negatively impact water supplies. Federal guidelines are in place for clean water quality. Statistics, graphs and maps on Sandusky River Watershed give information about the watershed. The Sandusky River Watershed has been designated a Scenic River and is administered by the Ohio Department of Natural Resources Scenic River Program. The history of the watershed and recreational opportunities are outlined. Problems of the watershed include combined sewage overflow. Cities are upgrading sewer system. The agricultural community has done much to conserve the land. The Sandusky River Watershed Coalition sponsors many programs to maintain the integrity of the watershed.

Commemorate NASA's 50th anniversary with this stunning high-definition series chronicling the inside story of the space agency's epic endeavors. From John Glenn's Mercury mission to orbit the earth, to Neil Armstrong's first historic steps on the moon, to the unprecedented spacewalks required to repair the Hubble telescope, these epic stories are shown in stunning clarity and told by the astronauts and engineers who were there. The missions, the people, and the triumphs of space exploration are revealed through exclusive interviews with celebrated astronauts including John Glenn, Buzz Aldrin and Charlie Duke, and newly-digitized, original mission footage from NASA's secret film vaults. Features: Six complete episodes Four DVDs Four hours of bonus features including digitally restored NASA film highlights, mission clips, and astronaut interviews. Ordinary Supermen NASA selects seven men to become the first astronauts. They're

Titles added 151 to 180 days ago

all test pilots, prepared to risk their lives. No one has ever survived a vertical launch on top of a rocket, but it's the only way they know to put an astronaut into earth orbit. NASA and America's first astronauts, the Mercury Seven, are on a journey into the unknown. Six of the men ride into space, each launch taking NASA further forward in their quest to conquer space. Friends and Rivals Nine new astronauts arrive at NASA - their mission, to test all the procedures required to land men on the moon and bring them safely back to earth. Each Gemini mission launches two men into space, leading to some of NASA's greatest moments - Ed White's spacewalk, the first orbital rendezvous of Gemini 6 and 7, and Neil Armstrong's first space docking. Landing the Eagle The Apollo program is set to achieve the ultimate prize of the Space Race, landing men on the moon. But a fire breaks out in the pressurized capsule of Apollo 1, resulting in the deaths of three beloved astronauts. However, NASA rebounds, launching men into deep space and landing Neil Armstrong and Buzz Aldrin on the moon. The Explorers Apollo 13 puts the astronauts to the ultimate test, returning a damaged spacecraft back safely to earth. Apollo 17 sends man for the longest mission yet to the surface of the moon, but it's the last lunar mission for generations. Now, it's time for a new phase in the program. Converting an unused Saturn V rocket, NASA launches Skylab, America's first space-station. The Shuttle For its first 20 years, NASA launches capsules carrying a maximum of three people. But new requirements for a bigger cargo bay prompt a breakthrough in spacecraft design. The development of the re-usable shuttle leads to a revolutionary approach to space travel. Meanwhile, the pioneers of NASA's manned programs are leading the way into the modern era of the space-age. A Home In Space One of the most complex instruments ever built, the Hubble Space Telescope is expected to transform our understanding of the Universe. But once it is in orbit NASA discovers a serious problem, a defective main mirror. NASA sends a team of astronauts to fix the problem in its greatest and highest profile mission since the Apollo era. It gives NASA the confidence to begin construction on the International Space Station.
